

Clip Studio Paint now supports Apple M1 chip & macOS Big Sur
Apple M1 chip Macs provide a faster and more comfortable drawing experience when exporting multiple pages and images.

Clip Studio Paint, an illustration, manga, and animation production tool by Celsys, is now compatible with and has been optimized to take full advantage of Apple M1 chip. This means that Clip Studio Paint now runs as a native app on Macs powered by Apple M1 chip, improving the drawing experience and the processing speed when exporting multiple pages and images. We also support the newly announced macOS Big Sur by Apple.

Clip Studio Paint Ver.1.10.3 Update (macOS)

https://www.clipstudio.net/en/dl/release_note/

Clip Studio Paint is a drawing app for creating illustrations, comics, and animation. It has been used by more than 9 million creators* all over the world. Artists of all levels use Clip Studio Paint for its natural and smooth drawing experience, from digital art beginners to professional comic artists, illustrators, animators, and designers, as well as universities and vocational schools.

Celsys will continue supporting creators in the many aspects of digital art through the development and distribution of the latest creative tools.

*Includes trial users and downloads of the iPad, iPhone and Galaxy versions

CELSYS, Inc.

Celsys will continue supporting creators to create artistic content with digital technology.

We provide solutions for content creation, distribution, and browsing, including support of creative activities through our illustration, manga and animation production software “Clip Studio Paint” and web service “Clip Studio”, as well as our e-book solution, “Clip Studio Reader”.
