

Clip Studio Paint for Android Released Fully featured Illustration, Manga and Animation App

Celsys has simultaneously released the Android version of its Clip Studio Paint app on the Google Play Store worldwide on Thursday, December 10 (*1). The Android version also supports ChromeOS, opening the app up to Chromebook users as well. The app is fully featured and is built with all the same features as the Windows, macOS, iPad, iPhone, and Samsung Galaxy versions of Clip Studio Paint. Smartphone users will be able to use the app free for 1 hour every day, while tablet and Chromebook users will be able to use the app for free for 3 months with their first plan. After the free offer ends, users can sign up for a monthly usage plan to continue using the app.

(Supports English, French, Spanish, German, Korean, Chinese (Traditional), and Japanese)

With the new Android and Chromebook support, users can now create full-fledged graphic content on any device. It's now even possible to share works with other devices via the cloud so that users can get creative at any time now that the world is adjusting to a new normal.

Moreover, through a marketing partnership with Google, Chromebook users will receive an extra 3 months free (*).

- 3GB or more memory required, 6GB or more recommended
- Smartphone: 6"+ display recommended
- Tablet: 10.4"+ display recommended

Main Features of Clip Studio Paint for Android

Clip Studio Paint is a drawing app for creating illustrations, comics, and animation. It has been used by more than 9 million creators (*2) all over the world. Artists of all levels use Clip Studio Paint for its natural and smooth drawing experience, from digital art beginners to professional comic artists, webtoon artists, illustrators, animators, and designers, as well as universities and vocational schools.

• Beautiful, professional lines

The S Pen's pressure sensitivity is supported by the app on Galaxy devices that come with one, and on Android, users can draw lines just as they imagine with the line stabilization feature to prevent shaky lines and pen pressure adjustment. The app comes with a range of preset brushes such as pencils, G pens, watercolors and oils, or users can customize and make their own original brushes. Using vector layers, users can easily adjust their lines after drawing.

• More than 60,000 materials

Clip Studio Assets offers more than 60,000 materials such as brushes, patterns, and 3D models. Users can also upload and share original materials.

• Tools to realize an artists' vision

The app comes with 3D drawing figures to use as drawing references. Users can even use photos taken with an Android device as a base for a pose. Useful features such as AI-based automatic colorization and line extraction, which takes lines from photos in the camera roll, or converts photos into screentones, also come as standard.

• Enhanced Webtoon Features

Features to make creating vertically-scrolling full-color webtoons easier, such as a smartphone screen viewer to check what is being shown on the user's screen at one time and easy division of long canvases for export, have been added.

• Sharing Timelapses to Social Media made simple

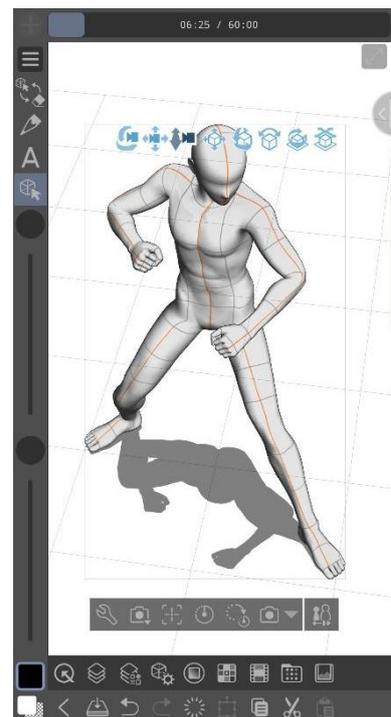

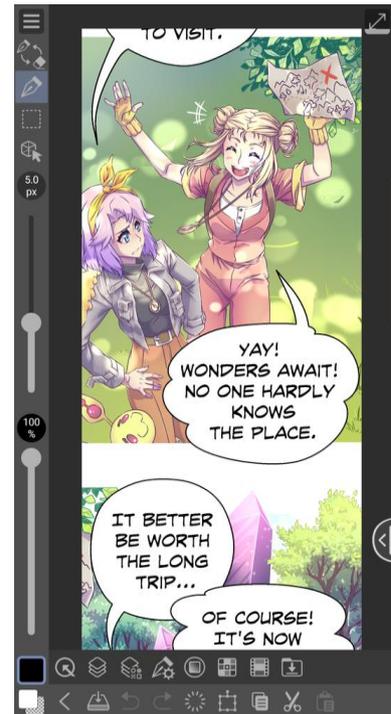

The timelapse feature makes it easy to record the creative process and share videos of techniques and tips with others.

• Connectivity with Wacom Intuos and Wacom One tablets

By connecting their devices to the Wacom Intuos or Wacom One tablets, users can use pen pressure to draw with the same subtlety and expressiveness as on a computer.

• Saving to the Cloud on a PC or even a tablet

Works can be synced to the cloud whenever they are saved. This allows users to have more freedom to be creative outside on their Android smartphone so they can focus on the small details to finish up their piece at home on their computer or tablet.

*1 The release date may vary for some regions.

*2 Includes trial users and downloads of the iPad, iPhone, and Galaxy versions

CELSYS,Inc.

Celsys will continue supporting creators to create artistic content with digital technology.

We provide solutions for content creation, distribution, and browsing, including support of creative activities through our illustration, manga and animation production software “Clip Studio Paint” and web service “Clip Studio”, as well as our e-book solution, “Clip Studio Reader”.
